

weLLcome capital is a leading consultancy in the global private debt capital market. We promote an unparalleled set of financing programs that serve a range of companies, individuals and nonprofits worldwide.

ABOUT OUR FUNDING SOURCE

Working directly and under contract with our private lending group we market their programs and manage the strict intake protocols they have in place for each of their offers. The lending group is registered in the Caribbean, operates globally and has been lending since 2005.

The programs offered are powered by this group's own capital. Unlike traditional banking, conventional lending or venture capital; **this is a Privately Owned and Operated Wealth Lending Platform**. Our group does not pool capital from a stable of investors like most lenders do, they ONLY lend their own capital. Their programs are made possible due to the significant assets they hold and the very privileged relationships they enjoy with their banking partners.

Their capabilities are unique, and they can seem complicated for those who are used to conventional procedures. But these programs offer many significant advantages to clients - extremely low interest rates, unusually high returns with our [Sponsorship Program](#), no personal guarantees, great terms and risk that is fully mitigated because everything in the chain is insured.

Because our multiples based [4X Loan](#) and our matching [1X Loan](#) both require the client to bring their own capital to the transaction, we have a federally regulated coupon bond mechanism in place for the safekeeping of all client funds. This ensures clients that their capital is always safe, secured and bonded by the bank. The client's capital remains in their own account and is never encumbered and is not the collateral for any loan.

There are several channel partners involved in the processes that make all of this happen; from top tier banks and prominent insurers, to international accounting firms and the world's largest global law firm and a highly specialized investment bank. The backoffice involves sophisticated international financing mechanics that are governed by the compliance rules and regulatory oversight of the central banks. It is important that you know this is not a retail lending experience.

Operating among these prominent and highly reputable channel partners is the evidence that you need to be confident we are offering powerful funding options from a legitimate, capable and very well connected global lender.
